

Charlie Ferranti,

This is in response to your note on 2/20/02. There is indeed flagging in the "Tex" project area. The purpose of this flagging is to identify locations for the people who are conducting surveys under survey and manage. I am not aware that complete units have been marked.

Regardless, there is nothing definite about these locations and this is only preliminary. As I stated in my first letter, we do not have a proposed action and probably will not have one until after calendar year 2002.

Attached to this letter is a copy of the roads in the area with the potential cutting areas marked as well as copies of two "ortho-photos" with **potential** cutting areas identified.

Let me know if I can be of further assistance.

Don Davison
